The LibraryBox Project

What is LibraryBox? Info Downloads Support Social Media Map Meta

## LibraryBox v2.1: Portable Private Digital Distribution

LibraryBox is an open source, portable digital file distribution tool based on inexpensive hardware that enables delivery of educational, healthcare, and other vital information to individuals off the grid.

Build your own LibraryBox!

Upgrade your existing LibraryBox to v2.1!

### LibraryBox v2.1 Now Available!

#### The LibraryBox Project

LibraryBox is a fork of PirateBox for the TP-Link MR 3020, customized for educational, library, and other needs. LibraryBox was conceived and created by Jason Griffey.

#### Why LibraryBox?

LibraryBox is a digital distribution tool for education, libraries, healthcare, and emergency response. Anywhere there is a lack of open internet access, LibraryBox can bridge the gap of information delivery.

#### About v2.1

Funded by a Knight Foundation Prototype Grant, the v2.1 of LibraryBox makes it better in nearly every way. Take a look at the improvements and learn more about the v2.1.

### Jason Griffey

Title: Librarian, Technologist, Founder  
 Employer: Evenly Distributed  
 Degree: MSIS  
 Graduation year: 2004

"A good understanding of the theory, a grounding in technology, and experience in one of the amazing libraries on campus, and I had a great baseline from which to grow the rest

Jason Griffey (MSIS '04) is a librarian, technologist, and founder/principal at Evenly Distributed LLC, which provides consultation to libraries in need of expertise in strategic technology planning and building projects. He is also a Fellow at the Berkman Klein Center for Internet & Society at Harvard University.

Since graduating from SILS, Griffey's career path has kept him on the forefront of new and innovative processes to help libraries and their patrons. He was selected by the Library Journal in 2009 for the "Trendsetters" category in its "Women & Shakers" issue. In 2012, Griffey initiated an open-source project called LibraryBox, a "portable digital file distribution tool" designed to connect locations with limited internet connectivity with digital information.

## MEASURE the FUTURE

Public Beta Blog Code About Contact

### Measuring Attention in Library Spaces

Imagine having a Google-Analytics-style dashboard for your library building: number of visits, what patrons browsed, what parts of the library were busy during which parts of the day, and more. Measure the Future is working to make that happen by using open-hardware based sensors that can collect data about building usage that is now invisible. Making these invisible occurrences explicit will allow librarians to make strategic decisions that create more efficient and effective experiences for their patrons.

Our goal is to enable libraries and librarians to make the tools that measure the future of the library as physical space. We are going to build open tools using **open hardware** and **open source software**, and then provide **open tutorials** so that libraries everywhere can build the tools for themselves.

#### Director of Strategic Initiatives

Jason Griffey is the Director of Strategic Initiatives at NISO, where he works to identify new areas of the information ecosystem where standards expertise is useful and needed, as well as leads several ongoing projects such as NISO's participation in the Coalition for Seamless Access. Prior to joining NISO in 2019, Jason ran his own technology consulting company for libraries, has been both an Affiliate at metaLAB and a [Fellow and Affiliate at the Berkman Klein Center for Internet & Society](#) at Harvard University, and was an academic librarian in roles ranging from reference and instruction to Head of IT at the University of TN at Chattanooga.

Jason has written extensively on technology and libraries, including multiple books and a series of full-periodical issues on technology topics, most recently [AI & Machine Learning in Libraries](#) and [Library Spaces and Smart Buildings: Technology, Metrics, and Iterative Design](#) from 2018. He has spoken internationally on topics such as artificial intelligence & machine learning, the future of technology and libraries, decentralization and the Blockchain, privacy, copyright, and intellectual property. A full list of his publications and presentations [can be found on his CV](#).

Jason has a Masters of Library and Information Science from the University of North Carolina at Chapel Hill, and a Bachelors of Arts from Morehead State University.

# Google's New AI Can Mimic Human Speech Almost Perfectly

 StationaryTraveller/Getty

## IN BRIEF

---

Last year, DeepMind shared details on WaveNet, a deep neural network capable of producing realistic-sounding synthetic speech. Now, the system has been refined enough to warrant a full rollout for Google Assistant across all platforms.

## WHO IS RESOOMER FOR ?

---

### FOR COLLEGE STUDENTS

---

With Resoomer, summarize your Wikipedia pages in a matter of seconds for your productivity.

### FOR PROFESSORS

---

Identify the most important ideas and arguments of your texts so that you can prepare your lessons.

### FOR JOURNALISTS

---

If you prefer simplified information that summarizes the major events, then Resoomer is for you !

### FOR EDITORS

---

Identify and understand very fast the facts and the ideas of your texts that are part of the current news and events.

### FOR PRESS RELEASES

---

With the help of Resoomer, go to the main idea of your articles to write your arguments and critiques.

### FOR READERS

---

Save time, summarize your digital documents for a relevant and fast uptake of information.

Scholarcy creates a summary flashcard from any document, giving you the key facts faster.

ASK

Alexa Skills Kit

Announcements

Education

We're excited to introduce the Alexa Education Skill API, a new set of interfaces that allow Education Technology (Ed Tech) developers

We worked closely with a variety of leading Ed Tech companies to develop the Alexa Education Skill API. These developers will release skills later this year with the following use cases:

- [Kickboard](#): launching a new skill that allows parents to receive school communications about their child's behavior in school.
- [ParentSquare](#): launching a skill that enables parents to get school messages, posts and updates with Alexa to help parents stay connected to school.
- [Coursera](#): launching a skill that allows students over 13 to stay updated on their coursework and check their progress for any courses they are enrolled in on the Coursera platform.
- [Canvas](#): updating their Canvas skill to enable customers to ask for updates on assignments and school communications for parents and students over 13.
- [Blackboard](#): launching a skill that will include upcoming assignments for parents and students over 13.

If you are interested in getting updates or learning more about the preview, [please visit our](#) site and sign up.

A dramatic landscape photograph of a sunset or sunrise. The sky is filled with layers of clouds, transitioning from deep blue at the top to bright yellow and orange near the horizon. The sun is partially obscured by the dark silhouettes of trees and hills in the foreground. The overall mood is contemplative and serene.
