

The AIP Research Strategy

Cultivating Positive Change in the Physical Sciences

AIP Research brings together decades of research capabilities to focus on cultivating and empowering positive change in the physical sciences.

Mobilizing AIP Research Capacities

Thematic Areas of Focus

Supporting a **culture of inclusion & belonging** in the physical sciences

Advancing **equitable public policy** in the physical sciences

Ensuring **records of 20th & 21st century science are preserved & used**

Promoting **vibrant career trajectories** for physical science professionals

2025 AIP Research Agenda

The Next Generation of Scientific Society Leaders

A Century of Breakthroughs in Quantum Science & Technology

The Federal Physical Science Workforce

Climate, Atmospheric, and Oceanic Sciences Education Pipeline

Faces of the Physical Sciences
